Acme Corp IT Roadmap 2026

1. ERP Upgrade

Acme completed its ERP upgrade in March 2026. Finance and procurement now run on a single system, and the old ERP will be switched off in September 2026.

2. Cybersecurity Audit

An external cybersecurity audit of all Acme plants is scheduled for September 2026, following the new plant-network segmentation rolled out in spring.

3. Data Platform Migration

Acme is migrating its data warehouse to a cloud platform. Training for all analysts starts in September 2026, and the old warehouse will be retired in December.

4. Battery Analytics Platform

Orinda Systems' battery-analytics platform goes live at Acme in September 2026. It will monitor cell temperature and state of health across every pack in service.

5. IT Service Desk

Acme's IT service desk resolved 92% of tickets within one business day in 2026, and a self-service portal launches in September 2026.

6. IT Budget

Acme's 2026 IT budget is USD 18 million, with a mid-year review in September 2026.
