Acme Corp Annual Report 2025

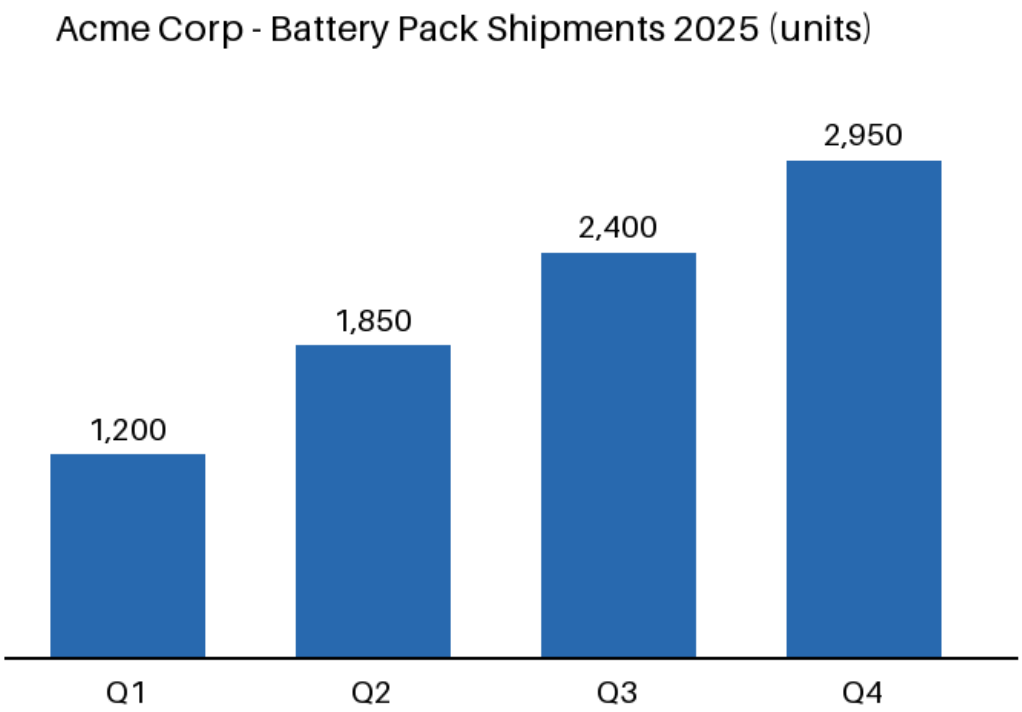

1. Company Overview

Acme Corp manufactures lithium-ion battery packs for electric buses and is headquartered in Austin, Texas. The company was founded in 2011 by Maria Okafor, who still serves as Chief Executive Officer. Acme employs 4,200 people across three plants. In FY2025 Acme shipped 8,400 battery packs, a 41% increase over the 5,960 packs shipped in FY2024.

Table 1: Financial Summary (USD millions unless stated)

Metric	FY2023	FY2024	FY2025
Revenue	612	798	1,134
Operating margin	6.1%	7.4%	9.8%
R&D spend	48	63	91
Net income	21	39	77

Figure 1 shows how shipments grew through the year as the Reno line reached full capacity.

2. Supply Chain

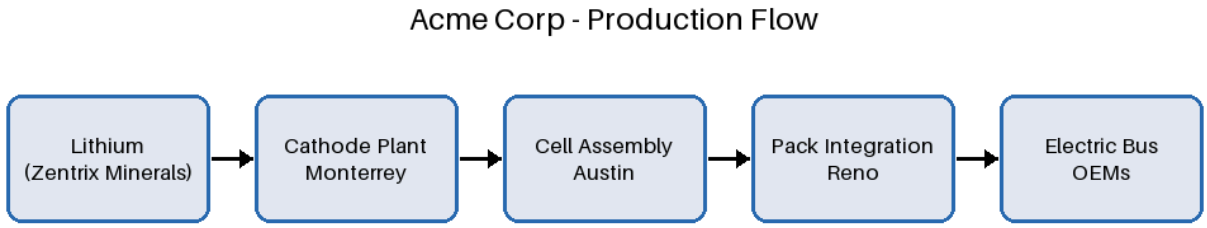

Lithium carbonate is our most critical input. Seventy percent of our lithium is sourced from Zentrix Minerals under a long-term contract; the remainder comes from Borealis Chemicals. The table below lists our key suppliers.

Table 2: Key Suppliers

Supplier	Material	Share of supply	Contract ends
Zentrix Minerals	Lithium carbonate	70%	Dec 2027
Borealis Chemicals	Lithium carbonate	30%	Jun 2026

Halden Metals	Nickel sulfate	100%	Mar 2028
Corvo Polymers	Separator film	85%	Sep 2026

Figure 2 shows our production flow from raw material to customer.

3. Risk Factors

Our largest supply-chain risk is concentration: a single supplier provides the majority of our lithium. Any disruption to that supplier's mining operations, whether operational or regulatory, would directly reduce our production capacity. We are evaluating a second-source agreement for 2027.
